EDUCATION

University of California, Irvine

B.S. in Computer Science

GPA: 3.70

Expected Graduation, Dec 2025

EXPERIENCE

Headstarter AI

Software Engineering Intern

Long Island City, NY

Jun 2024 – Aug 2024

- Developed 5+ application and APIs using Next.js, Gemini, Pinecone, achieving **96% accuracy as reported by 100+ users**
- Utilize Agile methodologies, **CI/CD**, and **Git** to lead project from ideation to deployment, following an iterative SDLC
- Collaborated with mentors and engineers in regular meetings to discuss progress, challenges, and solutions
- Implemented detailed model evaluation metrics to assess and improve model accuracy and overall system efficiency
- Mentored by engineers at Amazon, Bloomberg, and Capital One on **advanced frameworks** and **AI integration**
- Engaged in weekly technical interviews to rigorously evaluate and advance my technical knowledge and proficiency

NASA – L'Space Program

Software Engineering Fellow

Irvine, CA

Apr 2022 – Aug 2022

- Conducted in-depth research, identifying trends and opportunities that led to a **20% increase in project efficiency**
- Explored emerging technologies that aligned with the organization's mission, leading to enhanced project outcomes
- Collaborated with partners and community experts to gain comprehensive insights, enhancing project direction
- Built and nurtured relationships, effectively guiding decision-making processes for NCAS's Mission 1: Discover

PROJECTS

Fantasy Football App | Python, HMTL, CSS, SQL, Flask, React, UI/UX

Sep 2024

- Designed and developed a Fantasy Football App using React and Flask, tracking stats for a local 50-player league
- Enhanced SQL database performance, reducing **query time by 40%** and significantly boosting overall app speed
- Optimized load times with code-splitting and lazy loading, resulting in a **30% improvement in page rendering speed**
- Implemented dynamic scoring algorithms, automatically updating weekly rankings, improving **user engagement by 25%**
- Integrated user authentication and session management, resulting in a **100% increase** in secure user access

AI Chatbot | Next.js, React, Material-UI, Gemini API, Firebase, CSS

Aug 2024

- Developed and deployed a responsive, dynamic UI to **100+ users**, resulting in a **25% improvement in latency speed**
- Resolved **50+ bugs** throughout the software development lifecycle, ensuring a smooth and reliable user experience
- Integrated Google's Gemini 1.0 Pro model for AI-driven responses, enhancing **response accuracy by over 90%**.
- Collaborated with **several stakeholders** to develop an AI-powered assistant using Next.js, React, and Material-UI
- Enhanced user functionality by designing an intuitive feedback system for scaling mobile and desktop applications

Weather Predictor | Python, Nominatim API, JSON, HTTP Requests

Jan 2024

- Achieved **90% accuracy** in weather data retrieval, delivering descriptive **hourly** forecasts for the next 7 days
- Optimized data pipelines managing **1,000+ API calls**, reducing response time by **+50%** and improving code organization
- Utilized static methods for HTTP requests, error handling, and data manipulation, leading to a more robust codebase
- Improved processing efficiency by 25%** using modular code and incorporating class-level constants for API endpoints

SKILLS

Skills/Frameworks: Python, Java, HTML, C, C++, Flask, React, Next.js, Assembly, Microsoft Visual Studio, IDLE, Git, SQL

Certifications/Achievements: AWS Cloud Practitioner, x4 Honors Roll, UCI CS Distinguished Student

Relevant Coursework: Data Structures & Algorithms, C++ Programming, Python Programming with Libraries, Computer Discrete Mathematics, Computer Organization and Assembly Language, Statistics

Interests: Traveling, Gaming, Basketball, Soccer, Weight Lifting, Volunteering, Music, Board Games
